

NYQUITILES ROUND

ABSORPTION

PRODUCT CHARACTERISTICS

NyquiTiles Round is the name for upholstered acoustic panels with a high sound absorption coefficient. Our architects have created a series of panels with unique shapes that can be combined to create modern and spatial compositions. NyquiTiles Round panels come in many sizes and over 100 standard colours, giving us almost unlimited design possibilities.

The outer layer is made of a high-quality decorative felt, which is acoustically transparent and resistant to dirt and mechanical damage. The inner side of the panels consists of an absorber with the highest sound absorption class A. A unique fastening system with magnets allows quick installation of the panels side by side. NyquiTiles Round panels are made of flame retardant materials and can therefore be used on the walls of public buildings.

NYQUITILES ROUND

ABSORPTION

MATERIALS

NyquiTiles Round is the name given to decorative panels with high absorption properties. They are made of special acoustic foam with an "open-cell" construction. The outer layer of the panels is an acoustically transparent material, resistant to abrasion, creases and dirt. You can choose a fabric from several materials, differing in structure and colours. The product is ecological and environmentally friendly. The thickness of the absorbent material is 20, 30, 40 or 50 mm. Due to the production process, the panels may differ in dimensions by +/- 2mm.

PRODUCT PROPERTIES

	ABSORPTION COEFFICIENT	≥ 0,9
	ABSORPTION CLASS	A
	FINISHING	acoustic felt
	COLOURS	wide selection
	SHOCK RESISTANCE	high
	ANTISTATIC	yes
	ASSEMBLY	hung on cables
	CLEANING	damp cloth

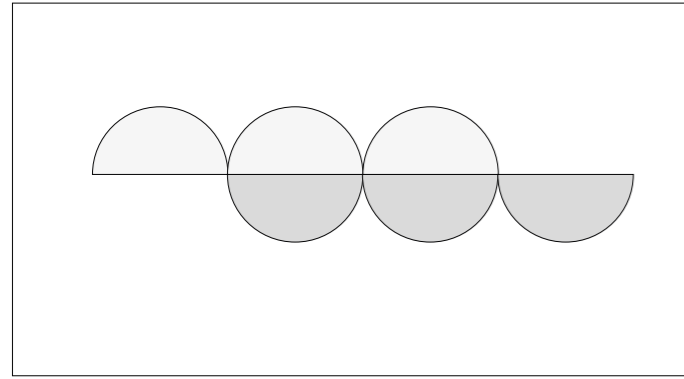

INSTALLATION

The panels can be installed to the wall with glue, magnets or special mounting strips. The panels can be installed side by side or at any intervals.

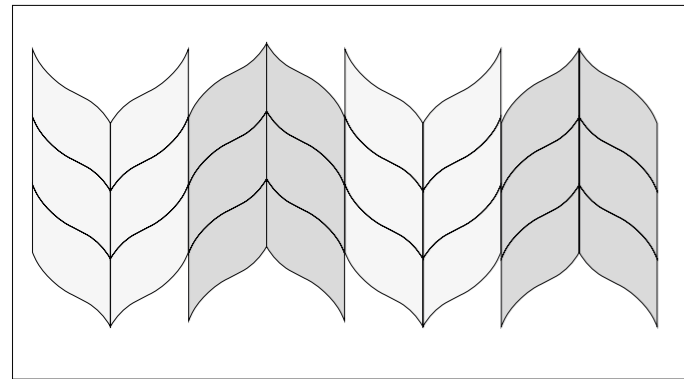

TECHNICAL DRAWINGS

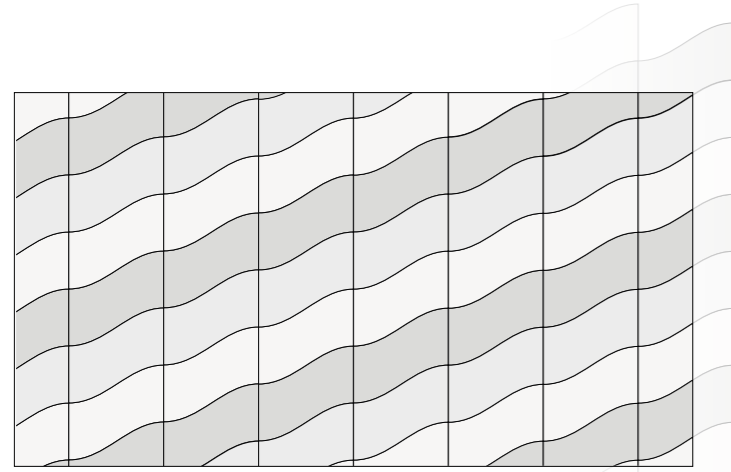

EXAMPLE COMPOSITIONS 5 X 2,8 M

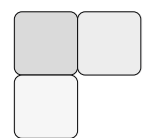

HalfCircle L, 1000 x 500 mm

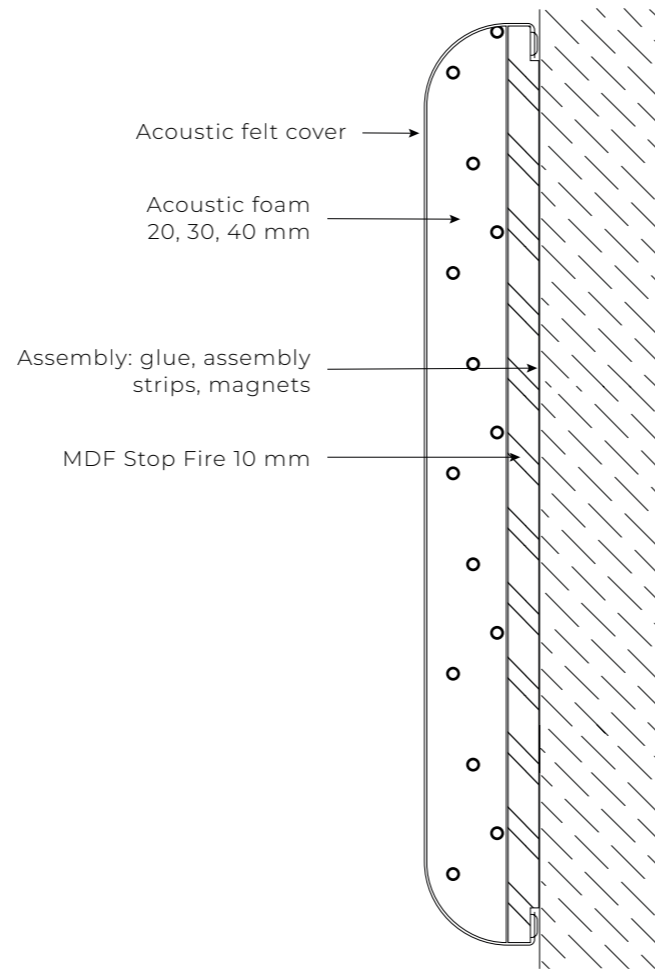

Field L, 1200 x 1093 mm

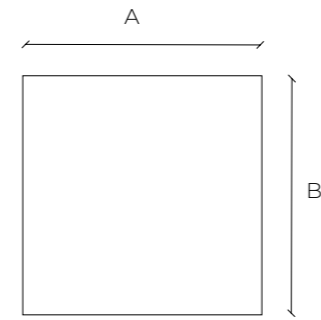

The wall is finished with the NyquiTiles Round system with a set of panels made to fit the wall.

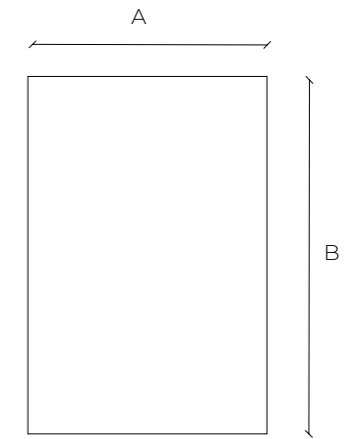

Colours symbolize different foam heights, 20, 30 i 40 mm
