

## OFFICEDIVIDER

ABSORPTION / INSULATION

### PRODUCT CHARACTERISTICS

OfficeDivider are acoustic partitions designed for open office spaces. Thanks to them, we can effectively separate individual workstations or groups of positions, separate the employee part from the communication part or create a special relaxation zone.

OfficeDividers provide a high level of acoustic comfort. On both sides of the walls there are acoustic panels with a high sound absorption coefficient, which reduce reverberation. An insulating core is installed between the panels, which is responsible for reducing the propagation of noise in the room. The wall consists of a painted steel frame fixed to the floor and ceiling. The sleek, openwork design does not overwhelm the interior space or restrict communication between employees. The size and finish of the wall can be chosen from a variety of available variants, making it easy to adapt them to a given space.

In addition to the office acoustic function, The Divider provides employees with a sense of privacy without limiting the dynamic and open nature of the office, providing users with intimacy and comfort.

## OFFICEDIVIDER

ABSORPTION / INSULATION

	ABSORPTION COEFFICIENT	≥ 0,9
	ABSORPTION CLASS	D
	INSULATION	very high
	ODPORNOŚĆ NA UDERZENIA	high
	FINISH	depending on chosen variant
	ASSEMBLY	Frame mounted to ceiling and floor
	CLEANING	damp cloth
	COLOURS	large choice

### MATERIALS

The OfficeDivider wall frame is made of powder-coated steel in any color from the NCS palette. The insulating core is made of MDF. The infill consists of acoustic panels whose shape, color and size can be selected from the following series: NyquiWall, NyquiWall Print, NyquiTiles, EcoTiles, FiberFoam, WoodenWall, WoodenFiber, WoodenTiles.

### INSTALLATION AND CONSTRUCTION

Office Divider walls are installed using dedicated solutions screwed to the ceiling. The entire structure is mounted on a steel rack.

TECHNICAL DRAWINGS

EXAMPLE PATTERNS FOR OFFICE DIVIDER

Single module

Connected module

WALL FINISH:

- EcoTiles
- WoodenTiles
- NyquiTiles Round
- FiberFoam
- NyquiWall
- NyquiWall Print
- WoodenWall

RACK FINISH:

- Colour RAL

HOW CAN YOU PLACE AN ORDER?

**SELECT:** Finishing the wall (finishing technology), a pattern from a given technology, color according to technology, the color of the rack, quantity (single and combined modules)- It is worth specifying the height of the ceiling in a dedicated space.

*E.g.: NyquiTiles Round, Field, Felt blue color 109, NCS rack 1000 N, Quantity 2x (triple joined modules), ceiling height - 2900mm*
